空压、制氮和组胺及项目招标公告

Figure 1. The effect of the *hsp70* promoter on the expression of the reporter gene in the *hsp70* promoter-reporter gene construct. The *hsp70* promoter-reporter gene construct was transfected into the cells of the *hsp70* promoter-reporter gene construct. The cells were then treated with heat shock (42°C) for 24 h. The cells were then harvested and the reporter gene expression was measured by luciferase activity. The results are shown as the mean ± SD of three independent experiments. *p < 0.05, **p < 0.01, ***p < 0.001.
